

Answer to request for clarifications

RFP22-4491- CKAN and web development services

Date: 10/10/2023

Requirement analysis

1. Please specify the time duration for this requirement analysis.
 - It would depend on each on-demand projects. There are no specifics at this time.
2. No SPOC has been mentioned which is to be contacted for the further queries.
 - The selected contractor would be in contact with the Pacific Data Hub Programme (PDH) Manager and PDH Solution Architect. It will however be another person once a project manager is on board. For requests coming from divisions, different contacts persons will be provided.
3. For the stakeholder, please provide a list if they handle departments separately. Solutions/products that are fit for purpose, who will be a decision maker?
 - This information will be provided to the selected contractor.
4. Please elaborate the roles and responsibilities.
 - SPC will share requirements, the provider analyse them and ask questions if more information is needed.

Legacy Applications

5. What all applications are being currently used and what are its respective running versions?
 - At this time, we do not have a list of all systems and apps used within SPC.
6. What all existing Product Categories are to be considered please suggest?
 - All information is in the terms of reference of the RFP.

Migration

7. Any Existing Application and its data need to be migrated? This may require details of those software and mapping with the old data. Kindly elaborate.
 - Out of scope. The RFP does not mention any kind of migration.

Digitization

8. Status of present digitization (do we need to migrate any existing applications developed by SPC, Kindly elaborate?)
 - Out of scope.

Experience with Software

9. What kind of development is required in TerriaJS?
 - We may want to have support from different data sources (i.e. STAC) and different formats that the ones currently supported. Also might require some UI improvements, more configuration options.
10. Integration with how many applications will be required and which all applications are to be integrated?
 - TerriaJS is used as a previewer for geospatial data in CKAN catalogue.
11. What type of development experience is to be showcased/demonstrated in Geo server development?
 - Prove any contribution has been made to the open-source project.
12. What type of development experience is to be showcased/demonstrated in Geo node development, Kindly elaborate?
 - Prove any contribution has been made to the open-source project.

Software Versions

13. Are there some specific GIS software (open/commercial), experience on which is to be demonstrated?
 - Other than GeoServer, GeoNode and THREDDS, please provide any information on your work with ESRI products or other open source solutions.
