Answers to request for clarification RFP22-3288 – Digital Transformation Consultant

Date: April 6th, 2022

Is the overview of the digital transformation activities in the region focused on government transformation, or on government activities that support the digital transformation of their economy and society? In the latter case, are there specific areas you'd expect the consultancy to look at in priority?

Most of the regional strategies in the Pacific pertain, of-course, to government activities that support the digital transformation of the regional economy and society.

Government transformation are mostly in-country documents, with at times some statements about needs from a regional perspective.

Specific areas would include: regional connectivity strategies, regional digital skills, regional eCommerce strategies, regional CyberSecurity strategies etc.
